Taking NIHR research outcomes further

The Clinical Research Network has supported the delivery of thousands of studies across England, all asking important questions to develop new and improved treatments to benefit patients and the NHS. But how do we know what impact our research is having out there to front line services?

Blog by Rick Body on the REVERT trial

Rick Body is a member of the CRN: Injuries and Emergencies National Specialty Group. He writes about the REVERT trial, looking at SVT (supraventricular tachycardia) in emergency medicine.

anne creaton @annecreaton · Nov 16

@richardbody @DrGDH Thanks! @sewak69 will be in charge of this great project! An fine EM trainee in Fiji. A great year of EM research ahead!

INTERNATIONAL REACH

Yet more evidence shows that chest pain radiating to the RIGHT arm is more differentiating than pain radiating to the LEFT arm for suspected AMI in the ED. Congrats, Jim McCord! Privileged to be part of the study ncbi.nlm.nih.gov/pubmed/30747759
